Hrm Practices And Its Influence On Employee Performance Towards Job Satisfaction In Selected It Companies

Dr.M.Suryakumar, Dr.R.Velmurugan, Dr.J.Sudarvel,

Abstract: To maintain and increase the performance of an organization is one among the major aims of any HRM. In the recent past however, minimal studies have been carried out to extensively address the character of performance which takes different directions and has always been linked to HR practices which on manipulation gives different outcomes (Cary & William, 2005). When the study is carried out, it adds some outcomes to the already known HR practices and they include organizational, financial and the employee outcomes (CIPD Publishing, 2005). The study further analyses how the human resource practices determine the dimensional outcomes and try to explain why job satisfaction is important for any organization.

Index Terms: Outcomes, HR Practices, Analyze, manipulation, job satisfaction, organization, character

1. INTRODUCTION
The human resource practices on human resource outcomes together with organizational outcomes show a substantially great impact than on the outcomes in finance. Further on the subject, job satisfaction in relation to HR practices and organizational outcomes is confirmed after testing the hypothesis in regard to job mediation. This is true considering that the attitudes of employees are important for HRM and their performance (Yoganandan, 2015).

2 LITERATURE SURVEY OF PAST WORKS
1) Saifalislam, K. M., Osman, A &AlQudah, M.K, In his investigation he inspects that effect of Human Resource Management (HRM) rehearses just as the elements that influence enlistment and choice just as preparing and advancement on the execution of the Jordanian Public University in the Kingdom of Jordan. The example includes staff and speakers of the college. The examination of the unmistakable insights and connections was utilized in this investigation. The investigation likewise prescribed the means to improve HR rehearses in the college.

2) Dr.MattijsLambooij, Prof. dr. Karin Sanders, Dr. Ferry Koster. &Drs. Marieke Zwiers. HR Practices and Organisational Performance: Can the HRM-performance linkage be explained by the cooperative behaviours of employees? This paper delivers the inquiry concerning whether the linkage among HRM and hierarchical execution can be clarified by the impact of the inside and vital attack of HRM on the agreeable practices of workers. These theories were tried utilizing staggered relapse (N=723 workers; 10 associations). The examination came about that participation with collaborators is adversely identified with turn over and decidedly identified with wiped out leave.

3) (Dr.Mayur Chaturved, 2019) (Dr.N.Akbar jan, 2016) (K, 2013) (P.Ramachandran, 2011) (Yoganandan G, 2013) (M, 2015) (Yoganandan G D. R., 2015), in his exploration he called attention to that the degree of fulfillment changes from division to area contingent upon the outstanding task at hand and working conditions and employer stability. Subsequently, the examination on representative occupation fulfillment having a place with various divisions comprehends the general occupation fulfillment of the workers. In this investigation just four divisions are viewed as they are Education Sector, Public Sector, Private Sector and IT Sector. In spite of the fact that activity fulfillment in each part exclusively isn't considered, the examination gives the general pace of employment fulfillment, the explanations behind occupation fulfillment and furthermore the degree of fulfillment with different components of workers having a place with various parts.

4) Dr.N.Akbar Jan, Dr.A.Nirmal Raj and A.K. Subramani., concludes in his examination that new bits of knowledge that 21st century representatives they won't simply happy with money related plans and welfare measures, they additionally anticipates the difficulties in occupation, use and upgrading of abilities and learning

5) Nanjamari K., in his examination he uncovers that activity fulfillment of IT representatives is impacted by the city in which they live, giving understanding into more subtle, yet significant, fundamental factors maybe elite to IT laborers
6) P.RamaChandran, M.Kannan, B.Balaji, G.Ulaganathan, in his examination he unmistakably expresses that specialist's in IT industry has fallen prey to worry because of unsatisfied occupation for couple of various reasons, he likewise focuses that a representative is a piece of industry thus not just crafted by the worker must be considered yet additionally the components that can make the worker keep up his pace.

SCOPE AND PLAN OF STUDY & SURVEY PLAN
To carry out the study, a distinctive dataset from organizations had to be picked, and a survey of various firms from salem city has been accounted. Data required from employees was collected though questioners. The study gives an insight about the HRM practices involved in the organizations which will eventually help them in building better practices towards HRM, which will make their employees satisfied in their work.

DATA COLLECTION AND SAMPLING TECHNIQUE
The constructed dataset as described before has the ability to enhance our understanding on the factors like outcomes, job satisfaction and HR practices (Suryakumar, 2019). However, the dataset also presents some limitations. What this implies is that the study is based on prevailing theories and certified scales. Statistics for reliability have been carried out where possible using Cronbach’s Alpha in order to establish the reliability of the scales (Raymond et al, 2005). This helps in determining the consistence of the variables measures observed meet the latent dimension. Disproportionate Stratified random sampling technique is used in this study, Since only entry level employees from IT companies are taken into this research. So the sample size has been finalized as 262.

Objective: To inspect the factors(HRM Practices) influencing Employee performance

Source: Collected and Computed Through Questionnaire

RESULTS AND DISCUSSIONS
The factors which persuades the respondents to show the reasons accountable for employee performance which shows that High Wages linked to performance is ranked first followed by Integrated Team Working as second. Employees believe that performance based will only be the major key factor decides productive competition among the employees which will make them to work better, also many believe that “Integrated Team Working” should be followed in-order to have risk free environment.

CONCLUSION
If firms are in a position of applying more HR practices in accordance to their workers, then it means that such organizations are able to experience a higher level of client satisfaction, a decreased sickness absence in addition to better net margins.

Further Suggested Work

This study can further be extended by checking up on the Employee Engagement and OCB (Organizational Citizenship Behavior) of the employees.
