

Mars Angel (Prehistoric Human Ancestor)

M.Arulmani, V.R.Hema Latha

Author Submission and Abstract: The philosophy of Angel was originated from Greek origin. Angels are depicted as benevolent celestials Human with wings. In many global level religions Angels are considered as Messenger of God and intermediator between HEAVEN and EARTH carrying the message of God to the human on the earth. In evolutionary theory Darwin Sir already established that human ancestor of Apes lineage. In human Anthropology there are so many human like flying celestials idols were unearthed as evidence of prehistoric human culture. Is there any possibility of existence of human with wings in Prehistoric time? It is focused by the author that the Tamil based Indians have already lived in MARS planet in Prehistoric time before started living on EARTH. The Prehistoric population lived in MARS probably called as ANGELS.

Are Angels real human?
(Or)
Imaginary human logo?

Introduction

It is focused that Angels shall be considered real human populations lived in Mars. The **Angels** shall also be considered as **Trisomy** populations having 3 chromosomes on origin. Further it is focused that they might have had different **genetic** characteristics and capable of **flying** when live in **MARS**. Angels shall be considered as **Message Carriers** just like present day Postman when lived in **MARS**. In global languages such as **old French, Latin** the word Angel is called as **Angele, Angeleo**. It is focused by the author that the etymology of word might be derived from the Prehistoric Tamil Phonetics **Anjal, Anjali, Anjan**.

- i) **Anjal** shall mean **Post**.
- ii) **Anjali** shall mean **Queen of MARS**
- iii) **Anjan** shall mean **Messenger, Postman**.

The philosophy of prehistoric populations lived MARS was already published in IJSRP issue 4, 2013 under the title **Cosmo Super Star** and in IJSER issue 5, 2013 under title of **Super Scientist of Climate Control**. This article **MARS ANGEL** shall be considered as extended version of previous articles published with additional case studies focused in different area related to **Angel**.

Hypothesis and Definitions

1. **Angel** shall be considered as **Trisomy** human populations having 3 chromosome.
2. The **Angel** human might have derived three chromosome from three Neutrino Particles **Photon, Electron, Proton**.
3. The Angel human might have lived under different genetic characteristics and capable of **flying**.
4. The Angel human shall be considered as electromagnetic populations evolved spontaneously due to impact of Electromagnetic radiation (EMR) from **Dark Energy** of space. The Angel human shall be considered as byproduct of electromagnetic equilibrium composed of millions of **electromagnetic cells** comprising of Photon, Electron, Proton. In prehistoric time, the human cell might have been defined as below.
 - i) **RNA** - **Photon**
 - ii) **HORMONE** - **Electron**
 - iii) **DNA** - **Proton**
5. In Prehistoric time the **Angel** human might have had **AB** type blood. The **acronym AB** shall mean **Angel Blood**.
6. In Prehistoric time **Angel** might mean **standard secret numerals** called **LOGOS** which might be adopted for sending message in **Code form**.

i)

(LOGOS)

- M. Arulmani, B.E. (Engineer)
- V. R. Hema Latha, M.A., M.Sc., M. Phil. (Biologist)

ii)

(Electro Magnetic Cell)

iii)

(MARS ANGEL)

Angel shall mean **“LOGOS”** AND Queen of **MARS.**
- Author

New Definition for ANGEL:

Angel shall be defined as spontaneously evolved organism composed of Billions of **Cells**. Photon, Electron, Proton shall be considered as the three fundamental elements of the Cell to make the **Life**. In Modern time the biologists might have called these three fundamental elements of organic cell as follows.

- i) Progon - Chromatin
- ii) Electron- Nucleolus
- iii) Photon - Cytoplasm

CONCLUSION

MARS Angels are not fiction populations; but real populations lived in MARS in prehistoric time having different genetic characteristics. Further it is focused that human ancestor are not of **APES**. Human ancestors are like **ANGELS**.

Case study

1. MYTHS

The word myth refers to a story from ancient time to explain natural event or to describe the earlier history of people. In the archaeological science there is an existence of so many mythological belief such as Greek mythology, Roman mythology, Hindu mythology, etc. It is focused by the author that the etymology of word myths might be derived from prehistoric Tamil phonetics **MUTHU**. In prehistoric time MUTHU shall mean **ANGEL** valuable and mystic resource. During the course of time the word MUTHU dialectally pronounced by foreign tongue as **myths**. In mythology **Myth** shall mean **Angel**.

i)

(MUTHU)

ii)

(ANGEL)

2. PHILOSOPHY OF “LOGOS”

It is believed that the word “Log” is considered as the abbreviation of **Logos**, Concerned with various logarithmic functions of mathematics, and various algorithmic functions of computer languages. Log is considered as the short form of logarithm used to describe a system of arithmetic using increasing powers of a number rather than a linear scale. In other words it can be said that it is concerned with **high level computational** methods in the order multiple or divisive level. Logos is also considered as **Divine word** and play major role in usage in the field of philosophy, psychology, rhetoric, religion. Originally Logos meaning **Ground**, a **Plea**, an **Opinion**. In the latter it is used as a **technical term** to denote the principle of **order of knowledge**. Ancient philosophers used the term **Logos** in different ways, the **sophists** used the term to mean **discourse**, **Artisotle** applied the term to refer **reasoned discourse** (or) the **argument** in the field of rhetoric. The **stoic** philosopher defined the term with divine animating principle pervading the **Universe**. In **Jewish** philosophy also this term is adopted. In **Bible** the Gospel of Jhon identifies **Logos** through which all things are made and further identified that **Jesus** as the incarnate of Logos. In scientific field the word **logy** as **suffix** finds many application such as biology, Astrology, cosmology, psychology, etc.

In religious sense the word **Logos** related to **cosmic law** or super wisdom and considered as the instrument of **God** in the creation of the universe.

In modern Computer digital communications so many **logic gates** are in usage such as **AND, OR, NOT, NAND, NOR, XOR**.

It is hypothesized by the author the concept of word **Logos**, **Log**, shall be considered as the communication code used by **Angels** also called as **MARS CODE**.

In the above prehistoric code form Logos the right dot shall be considered as the Vowel, left dot shall be considered as the Consonant, the centre dot shall be considered as the law part of **Nature** (or) **Universe**.

3. “PH” VALUE OF BLOOD

Modern human have PH value of blood in the range of **7.4**. It is hypothesized by the author that in prehistoric time the PH value of **MARS** populations might be so **acidic** and in the range of **3.0** which might be formulated with **three tiny dot**.

4. Case Study on Miller experiment:

(Electromagnetic evolution is possible?)

It is the hypothesis of the author that the three elements Carbon, Nitrogen and Ozone are considered as elements of life posses three types Magnetic Property. Based on the interaction of three magnetic field the evolution of human is possible. Some case studies shows that Organic molecules important for life could have reached earth surface via Comets. Further Miller experiments concludes that biological Molecules can be Synthesised strictly by non-biological means using raw materials available only on the earth. It is the speculation of the author that even before evolution of ocean on the earth, existence of human is possible on the clouds and could be evolved electromagnetically due to presence of three fundamental elements of life Carbon, Nitrogen and Ozone in the clouds.

Further it is the hypothesis of the author that the first human might be the byproduct of electromagnetic equilibrium in the evolution of early universe to create equilibrium. Infact the evolution of first human shall be considered as **Eco Man** for Eco balance.

5. What is the source life?

Life shall be considered originated as the byproduct evolved spontaneously due to Prehistoric Electromagnetic radiation from prehistoric electromagnetic fluid (so called Amino acid) dark blood.

Life begun with 3 chromosome.
 - Author, BSNL, Madurai

Further EMR shall be considered as the anti-matter from which the prehistoric anti-matter such as Ocean, Land, Air have been evolved on the earth as byproducts.

Further the evolution of Hydrogen, Carbon, Nitrogen, Ozone shall be considered as the anti-matter from the anti-matter of EMR.

8. Author's Vision about Hydrogen atom:

Case study shows that hydrogen atom exists only with proton and electron but without neutron. It is hypothesised by the author that Hydrogen shall be considered as star particle (evolved from dark matter consists of anti-Neutrinos) rather than atom, which is the integral part of three fundamental neutrinos Photon, Electron and Proton. In otherwords it can be said that when hydrogen particle decayed three fundamental neutrinos Photon, Electron and Proton are evolved.

- (i) Photon is a neutrino (Neutral charge)
- (ii) Electron is a neutrino (-ve charge)
- (iii) Proton is a neutrino (+ve charge)

Anti-Neutrinos shall be considered as having contra effect to Neutrinos, say, anti-Photon, anti-Electron, anti-Proton. Further Hydrogen shall be considered as the Stem of Life and Carbon, Nitrogen, Ozone shall be considered as the byproduct of hydrogen.

6. Three elements of electromagnetic wave:

The three elements required for production of Electromagnetic wave was formulated by prehistoric Tamil Law as follows.

7. EMR has any genome make up?

It is hypothesized by the author that EMR has specific genetic make up and sequence in the evolution of early universe (i.e.) The EMR emanated from Neutrinos shall be considered as the Centromere for evolution space objects such as Sun, Earth, Moon in certain sequence and having mutually binding characteristics. Neutrinos shall be considered as the integral part of Photon, Electron and Proton.

Hydrogen shall be considered as the Centromere and CNO shall be considered as the base of Life. In other words Carbon shall be considered as the Soul of hydrogen, Nitrogen shall be considered as the body of hydrogen, and ozone shall be considered as the mind of hydrogen. Case study show that Hydrogen fusion plays Vital role in CNO Cycle.

Hydrogen the Centromere and Stem of Life.
- Author, BSNL, Madurai.

9. Life originated from Anti-matter?

It is hypothesized by the author that the first life has been originated from anti-matter (i.e.) life matter has been evolved from anti-matter. "H" shall be considered as the Centromere (embryo) of life. C, N, O shall be considered as the base of life Sun, Earth, Moon shall be considered as the Telomere of life.

Life = H + C + N + O
-Author, BSNL, Madurai.

10. Electromagnetic Blood (Hypothetical)

It is the hypothesis of the author as the Prehistoric human evolved of Electromagnetic Radiation the blood also might be evolved with fundamental three elements. The fundamental three elements and their magnetic properties were well defined by the Tamil Law as below

- (i) ● → **Hydrogen (Star dust)**
- (ii) ● → **Carbon**
● → **Nitrogen**
└─→ **Ozone**
- (i) ● → **Hydrogen (Non-magnetic)**
- (ii) ● → **Carbon (Ferromagnetic property)**
● → **Nitrogen (Diamagnetic property)**
└─→ **Oxygen (Paramagnetic property)**

Three main Blood constituents

- → **Carbon (Sun)**
- ● → **Nitrogen (Earth)**
└─→ **Ozone (Moon)**

cells. It is speculated by the author the process of supply and absorption takes place due to three magnetic effect of blood contain the above three elements in the blood. It is the speculation of author the first evolved blood AB type might be called as Electromagnetic blood which has special magnetic property of absorbing all the spectrum of frequencies in the electromagnetic Energy and looks BLACK Colour.

11. Case study about genome variation:

The Chromosome in human cell is an organised structure of DNA and protein found. The role of chromosome carries the heredity in the form of gene. In brief it shall be stipulated that chromosome deals with structural part and DNA deals with functional part. The total amount of genetic information in the chromosome of an organism includes its gene and DNA sequences. Human genome is made up of about 30,000 genes. A human genome contains about 3X10 nucleotide pairs and a bacterium contains 6X10 pairs. It is the hypothesis of the author all the genetic growth and genetic sequences are due to alignment of human heart beat with Natural frequency of earth.

12. Tamil law related to Trisomy Chromosome:

It is the speculation of the author that the first human might be evolved with Trisomy which was well defined by Tamil law

The present day observation of Trisomy 21, Trisomy 13, Trisomy 18 are not of genetic abnormality infact it is the genetic reflection of prehistoric human.

13. Tamil Law related to three most fundamental Organic elements:

It is the speculation of the author that in the prehistoric time there were only three fundamental elements existing which are required for producing organic molecules for existence of life. Natural radio activity, lightning etc which might have produced of ammonia, methere, carbondioxide elements and produce complex molecules known as Amino acid and Nucleotide base the basic substance required for living organisms. Tamil law has already defined the three fundamental natural elements as mentioned below. The star dust in the early universe is considered to have the chemical property as equivalent to Hydrogen.

Sun is responsible for existence of Carbon, Earth responsible for existence of Nitrogen and Moon is responsible existence of Ozone. The three fundamental elements are responsible for existence of three types of magnetic fields which were already defined by Tamil law as below

During blood circulation in human body blood supplies energy to the cells and absorbs unwanted particles from

It is the speculation of the author that the three Magnetic fields have definite sequential effect on genome variation in growth of Tissues of the living organisms.

14. Prehistory:

The **history** of events means the period when the events were occurred and recorded as **authentic document** within the jurisdiction of Archeology, Anthropology, supported by scientific evidence. **Prehistory** shall be referred to the period prior to history which are generally accepted, but not supported by any evidence at that moment. Based on Geological events and evolutionary facts, the different period shall be classified as (i) Prehistoric period (ii) Ancient Period (iii) Pre Modern Period (iv) Modern Period (v) Post Modern Period.

Prehistoric Human?...

Modern human is considered as **Homo Sapien Sapien** and believed to have shared common ancestry with **Apes**. Modern human has total chromosome of 46 Diploid number (or) 23 pairs (Haploid number) Further Oxygen (O₂) is essential for survival of Modern human. Within the Archeology, Anthropology the modern human evolution referred to various period such as **Paleolithic, Mesolithic, Neolithic, Chalcolithic** etc.

- (i) It is hypothesized by the author that the **Prehistoric human** shall be considered as follows
- (ii) The Prehistoric human has been evolved "**spontaneously**" (electromagnetically) on its origin due to effect of lightning emanated from **Dark Matter** of Universe.
- (iii) The Prehistoric human shall be considered evolved spontaneously from Prehistoric Organic Compound **Prokaryotes** by electromagnetic radiation justlike **mushroom formation**.
- (iv) The Prehistoric human shall be considered having chromosome of **3** diploid number the Prehistoric human on its origin shall be considered as **Half Male, Half Female** personality.
- (v) The Prehistoric human has been lived in **Oxygen-free** environment. (i.e) the Prehistoric human lived without need of Oxygen and survived with only **Hydrogen, Carbon, Nitrogen** based element and **Ozone ion (O), Methene** gas environment.
- (vi) The Prehistoric human blood shall be considered evolved with only single blood group **AB** type (Dark Blood).
- (vii) This blood has no **Oxygen** content and it shall be called as **Black Body Blood** as it has high cabability of absorbing electromagnetic radiation and Heat emanated from Dark Matter of Universe.

Whereas the Modern human has Four type blood group of **ABO** system A,B,AB,O.

- (viii) The Prehistoric human blood (Oxygen free) shall be considered as purely **Acidic** which **pH** Value well below **7.0**. Whereas the modern human blood has oxygen content and it must be always **alkali** having pH value **7.4** so that it can retain Oxygen.
- (ix) Prehistoric human are highly immune to disease like Cancer, Malaria, Dengue and lived for long time and many wonders in the Prehistoric time.

Prehistoric Human DNA Structure:

The DNA is considered as genetic code of cell, (i.e) the DNA shall be considered as Predefined law of the Cell within that the cell division takes place for growth. It is hypothesized that the Modern human is considered having **deviated genetic code** as against Prehistoric human whom have **absolute genetic code**.

Prehistoric Human immune System:

The Modern human is now a days subjected to various Bacterial, Microbial infections, Blood Pressure, Brain Tumor, Cancer, AIDs etc due to lack of Immunity. It is hypothesized that the lack of immunity in Modern human is due to having **Oxygen** rich content blood. Whereas the prehistoric human are very energetic, living for thousands of years, and they are not subjected to any illness like **Heart attack, Tumor, Cancer, AIDS** etc due to high Immunity. They had high immune system because they were living in **Oxygen free** environment and their blood was totally **Oxygen free** acidic and appeared as **Dark blood**. It is hypothesized that the Modern human lost their Immunity due to deviated DNA Structure and hence they need **Oxygen** environment for Survival. Further the modern human have **46** chromosome due to deviated genetic code as against prehistoric human who had only **3** chromosome.

15. Hypothetical blood diversity

It is hypothesized by the author that from prehistoric time to modern time there may be three states of blood group might have been evolved due to impact of electromagnetic radiation. 'O' type blood (universal donor) might be evolved during modern period.

- i. Stage i – AB type only (MARS TRIBE)
- ii. Stage ii – AB, A, B (DRAVIDIAN ORIGIN)
- iii. Stage iii – AB, A, B, O (ARYAN ORIGIN)
