Developing Reading Ability Through VAKT Technology

K. Manigandan, Dr. C. Vairavan, N. Santhakumar

Abstract
In this paper the writer will illuminate in general that the significance regarding Reading expertise among the ESL Classes. As per National Reading Panel (2000) portrayed that the “understudies who don’t create Reading familiarly, paying little mind to how brilliant they are, are probably going to stay poor Readers for the duration of their lives”. In the country like India, which has multi-refined likewise, has multi-language structure gives less hugeness to the recognition with Reading a substance in the ESL classes. The answer for the issue is in the hands of the Teachers and their methodologies to instruct Reading. It is the obligation of the language instructor to make the students to be familiar with all the language skills: Listening, Speaking, Reading and Writing.

Key words: ESL, Technology, Reading, Speaking, VAKT

I. Introduction
Reading is the significant expertise in improving the familiarity with Articulation, Stress, Intonation and Pause. Global Reading Association (2002) portrays the objective in familiarity guidance isn’t quick Reading, in spite of the fact that it happens to be a result of the guidance, however familiar important Reading”. Listening great models of familiar Reading doesn’t bode well or improve familiarity. Each student is distinctive in all the mental viewpoints when contrasted with other student. Henceforth, one procedure doesn't support the understudies to upgrade the Reading.

The student of this decade needs assortment and oddity in every one of the exercises. It is extremely troublesome for the instructors to satisfy their targets in their classes. The Government has additionally begun a few oddities in instructing like Smart Classroom and Digital Classroom for impedance understudies. In this manner gradually there is a supplementation of innovation in the language classrooms. This Paper additionally focuses on the approaches to upgrade Reading of the poor Readers in the ESL Classrooms with the supplementation of innovation in the instructing Reading Procedures and how to build up the productivity of the Language Teachers in the utilization of innovation while instructing Reading. Reading fills in as a significant aptitude in each walk of life. We can barely envision a day which does without Reading in a person's life.

Particularly, figuring out how to Read in English is a principal significant in the nation like India which is bearing multi-language and multi-social society. Maulana Abul Kalam Azad expressed that the “English has today become one of the significant dialects of the world, and Indians can disregard its investigation at the danger of misfortune to themselves”. Most of the understudies the individuals who are concentrating in rustic government schools need capability in Reading in English. It is seen that even the ninth grade understudy is attempting to Read a section from their English reading material furthermore; to make little endeavor to upgrade their Reading aptitudes in English by embracing different methodologies and Procedures and using different accessible innovations to instruct Reading to ESL students. In Indian setting, ESL students are appropriately prepared to Read in English adequately. At the essential level, the advancement of Reading aptitude is viewed as pinnacle significance yet once the youngster enters the fourth or fifth grade, instructing Reading arrives at an end as the educators do not feel that the educating of Reading is a fundamental prerequisite of ESL students. At this level, the crippled pursuer’s populace starts to increment and regularly it prompts drop outs. The English language educators should step up to the plate steps to build up the Reading abilities of ESL students and make use of the innovation in their language classroom so as to create premium and inspirational disposition towards figuring out how to Read in English in a powerful manner.

II. Review of Literature
The English language educator's methodology must be adjusted. More accentuation is given to create composing abilities as opposed to create Reading capacity of the understudies. Sheorey and Mokhtari (3) exhibited that ESL and US high reading-capacity understudies show practically identical degrees of higher announced utilization for psychological and meta cognitive Reading methodologies than lower-Reading capacity understudies in the individual gatherings, and keeping in mind that the US high-Reading capacity understudies appear to consider bolster Reading methodologies to be generally more significant than low-Reading capacity US understudies, ESL understudies credit high an incentive to help Reading methodologies, paying little mind to their Reading capacity level. Strain (2) has given a magnificent stage examination of the securing of Reading abilities. Students at the propelled level appear to be less restless contrasted and fledgling and halfway level understudies (6,8). Oczkus (6) depicted that the instructing is a scaffolded procedure dependent on mentor demonstrating, understudy support, what's more, four methodologies that great Readers use to fathom content: foreseeing, addressing, explaining, and abridging. Ipek (7) uncovered that Reading tension levels fluctuated related to language capability. Mokhtari and.

- Research scholar, AMET University, Chennai.
- Assistant Professor, AMET University, Chennai.
- Post Graduate Teacher, English, Velammal Vidhyashram, Chennai.
Reichard (4) demonstrated that English talking understudy’s mindfulness and saw utilization of Reading systems while Reading scholarly or school-related materials. Gomahy S(12) demonstrated that tuning in to speakers of English, watching news in BBC, Reading English papers every day and such related practices will upgrade English talking expertise. Words are amazing assets of correspondence - both recorded as a hard copy and talking. Improving word power will assist the understudies with gaining fearlessness and talk in English. Like some other expertise, English talking is likewise an aptitude. As instructors of English, we come into contact with understudies who have finished their examinations in English medium up to +2 thinking that its hard to talk in English. Gomahy S(11) depicted that at the point when understudies have great specialized learning and keeping in mind that going to a meeting on the off chance that they are not in a situation to answer the right way, when their demeanor comes up short, it reflects gravely. When they fizzle conveying everything that needs to be conveyed, their regard is injured and they feel crushed. Vairavan C(14) depicted that williams recognized the innovation of man and lady relationship in various recognition on social and enthusiastic. From along these lines the screenwriter has acquired ordinary exchange an emotional method to present their own involvement to the group of spectators. The characters are a type of reasonableness in his/her life. The characters comprehend this present reality or genuine character of the individual profoundly set in his/her psyche at last purposeful the crowd.

III. Improvement of Reading Skills to ESL

Students Reading comprises of numerous particular aptitudes which includes an interrelated and communicating aptitudes and capacities. The demonstration of Reading protects on the synchronous utilization of various aptitudes also, sub aptitudes and the capacities to disentangle images and to decide importance are huge in Reading. As indicated by Strang (1) “Reading is many sided. It is a visual assignment including sensatioDn and discernment. Reading is a mental procedure; it includes molding images with their implications to fathom a creator's idea. Reading is a perplexing and one of a kind encounter including the living being as an entirety. It is an example of exercises which differs with the pursuer's motivation and the sort of material which he is Reading". Having clear thoughts of what the components of Reading gives the instructor with inherent rules for instructional rehearsals. The fundamental components to grant Reading aptitudes to ESL students are as per the following: 1. Phonemic Awareness: It is the capacity to take note, consider and work with the discrete sounds in expressed words 2. Phonemic: This includes the connection between letters and individual sounds 3. Familiarity: It is the capacity to Read content rapidly and precisely. Familiar Readers perceive words consequently and gathering words as they read, making a progression of words as opposed to stops between words 4. Jargon: It alludes to words and their implications. Research has demonstrated that jargon information is a significant indicator of Reading understanding capacity. 5. Perception: Refers to the capacity to get it what one is Reading – cognizance is more that simply Reading or disentangling the words so anyone might hear.

IV. Purposes behind Poor Reading Ability among ESL Learners

Clearly a lion’s share of understudies is not ready to pursue the relegated reading material. Poor Reading capacity of the ESL students can be ascribed to the accompanying reasons: 1. Deficient presentation of the English language 2. Absence of phonological mindfulness. 3. More spotlight on to create composed ability and disregard of Reading abilities. 4. Absence of jargon and poor spelling information. 5. Unseemly strategy for showing Reading aptitudes. 6. Absence of inspiration. 7. Absence of precise educating strategy 8. Inadequate assessment framework. 9. Absence of dynamic support of the understudies in educating – learning process. 10. Impediment of first language.

V. Teacher’s Role in Teaching Reading Skills

The instructor preparing foundations may be in a viable manner to show the English language to the ESL students: The instructor ought to show the different ideas and creativities in teaching. If it is needed, the nature of instructor training needs to be improved. We can see the countless number of instructor preparing establishments working in our nation yet the nature of preparing given to them isn't sufficient. The vast majority of the establishments don’t have a language research facility. The understudy educators must be all around prepared to use the kept going innovation in their ESL classroom. The existing preparing program for the language instructors don’t give satisfactory chance to the understudy instructors to build up their educating competency. The reason for learning English is to utilize it in out day-to-day life and speaking with other individuals and not simply to get unimportant breeze through imprint in assessment. Vairavan (10) depicts that the particular attribute of talk may help explain the significance of silence in human communication (pp-160). Consequently the language instructors must give equivalent focus from making the understudies to breathe through assessment instead of to make the understudies to utilize the English language proficiently in their distinctive genuine circumstance. The read of great importance in the attitudinal change among the English educators and they ought to understand that the learning of library language is for utilitarian reason. The pace at which information is developing and changing is so quick, a significant part of the instruction we provide for our understudies will go obsolete inside their lifetimes. They should re-teach themselves for their professions. There is a requirement for preceded with regard for the instructing of Reading abilities up to the higher optional level. Along these lines, the educator must embrace new showing systems and creative procedures and make use of accessible innovation to show Reading aptitudes to ESL students. Clearly, it is seen that the ESL students experience issues is creating Reading capacity. The root reason for the issue is receiving improper strategy for showing language abilities to the understudies; what's more, they were made as aloof audience members. The principle zone to be improved lies in the assessment system followed in our instruction framework. It supports insignificant repetition memory of the understudies or maybe that building up their language aptitudes. The significance ought to be given to evaluate and build up the oral language abilities of the ESL students. In the language study hall, the understudies should play a dynamic job. The
majority of the understudies feel that their language class is dreary and exhausting to them. Sufficient opportunity was not given to build up their Reading capacity. The circumstance must be changed; the understudies ought to no longer stay as an aloof audience and just getting data from the educators. The most ideal approach to educate the second any language is to make a proper condition for the understudies to get familiar with the language. Making the language class as exuberant as conceivable and intuitive is in the hands of the English educators. The educator ought to likewise participate in the learning enacts of the understudies; Innovation can be utilized to break the repetitiveness of the language class and make the learning background as an agreeable procedure.

VI. Job of Technology in Teaching - Reading
To ESL Learners Innovation possesses a conspicuous spot in instructing learning process. The examination concentrates that the utilization of innovation in the language study hall upgraded their learning process and excite understudies’ enthusiasm for learning the idea through multi-tangible methodology. The multisensory technique depends on the reason that a few understudies adapt best when substance displayed in more than one methodology. Here comes the job of innovation in ESL classroom. The appearance of present day innovation is one of the most grounded impacts in propelling overall enthusiasm for broadening what’s more, improving the Reading abilities of each person. Reading lies in the front line of the training framework. The level of disappointment of the understudies from the essential to the higher auxiliary level demonstrates that the reason for this wastage lies in their undeveloped Reading power. The utilization of advances, for example, radio, TV, cell phones, media, PC and so on, in the language study hall helps the educators to improve the Reading capacity of the understudies. PCs in the ESL homeroom help the language instructors in a various manner. It gives and chance to give individualized guidance changes the cooperation design from one to numerous to balanced communication and clears approach to mimic and practice way to express the words and sentences. It ends up and powerful instrument to give drill and practice to the ESL students creates jargon what’s more, educates through multi – tactile methodology by utilizing PCs. In this methodology, the understudy sees, feels, says and hears the substance. The multi-tactile strategies that incorporate following, hearing, composing and seeing are frequently alluded to as VAKT (Visual – Auditory – Kinesthetic Tactile). The English instructors need to utilize the accessible innovations in a successful manner to improve the Reading capacity of the understudies.

VII. Conclusion
From this paper clearly the requirement for better Reading guidance ought to be given to the understudies by embracing different innovations to instruct how to Read capably in English. The English educator needs to give more significance to realize how to utilize innovation situated training among the ESL understudies. Presently, the opportunity has arrived to utilize current innovations in language educating so as to make the showing learning process adequately. ESL instructors to educate increasingly related innovation arranged Reading methodologies, for example, investigating the writings, speculating the importance of obscure words, utilizing lexicons. These Reading methodologies would help the innovation as a guide to show Reading aptitudes.
